INVITATION FROM CONCRETE 2027 CO-CHAIRS

DEAR CONCRETE INDUSTRY PARTNERS,

On behalf of the Organising Committee, I would like to invite you to Partner with us for the Concrete Institute of Australia's 33rd Biennial National Conference, Concrete 2027. The Conference will be held at the Brisbane Convention and Exhibition Centre from the 5-8 September 2027 and is supported by international partners The International Federation for Structural Concrete (fib), American Concrete Institute (ACI), RILEM, and the Asian Concrete Federation (ACF).

Whether you are a newcomer to supporting the Conference or will be continuing your existing alignment, the Organising Committee wish to extend their gratitude in advance for your support.

Under the theme "A Concrete Future: Digital, Durable, Decarbonised" the Conference will cover all aspects of concrete materials, design, construction, repair, and maintenance. The conference is dedicated to bringing together over 700 global leaders in the concrete industry and will cover the three most important aspects that will impact our concrete future – the digitisation and innovation in technology in the industry, long term durability and resilience of buildings and infrastructure, and the sustainability and decarbonisation of concrete construction. Combined with the construction in SEQ and beyond due to the 2032 Olympics, the conference is an amazing opportunity to be part of a generational change in the concrete industry in Queensland.

In particular, the Conference will offer participants from all around the world the opportunity to connect face-to-face, sharing research information, innovative and interesting ideas and practical know-how, with a wide variety of industry experts in the world class facilities of the Brisbane Convention and Exhibition Centre and the beautiful state of Queensland.

Concrete 2027 offers various Partnership and Exhibition opportunities tailored to your organisation's needs and goals.

Additionally, you can customise your desired package to align with your organisation's specific marketing and budgetary requirements.

The *fib*'s mission is to develop, at an international level, the study of scientific and practical matters capable of advancing the technical, economic, aesthetic and environment performance of concrete construction.

THE AMERICAN CONCRETE INSTITUTE (ACI)

Founded in 1904 and headquartered in Michigan, USA, ACI is a leading authority and resource worldwide for the development, dissemination, and adoption of its consensus-based standards, technical resources, educational & training programs, certification programs and proven expertise for individuals and organisations involved in concrete design, construction, and materials, who share a commitment to pursuing the best use of concrete.

ASIAN CONCRETE FEDERATION (ACF)

With the rapid development of countries in the Asian and neighboring region in recent decades, infrastructure development is at the hub of economic and engineering activities. Co-operation between these countries particularly in the development and construction sectors is vital. These involve the sharing of expertise and experiences with concrete which is the single most common material used in construction. As a result, the first gathering of the heads and representatives of concrete institutes in Asia under the name of "Asian Concrete Forum" was organised in Sapporo in July 2001, hosted by the Japan Concrete Institute. In 2003, at the Pune's meeting, the establishment of Asian Concrete Federation was agreed by consensus among all delegates attending that meeting.
